

CHARACTERISTICS

Active Ingredient

1 x 10¹⁰ *Bradyrhizobium elkanii* per ml

Package Size

- Volume of 4.4 L (149 fl oz) per case
- 4 x 50 unit case (45 cases per pallet)

Always read and follow label instructions

ON-SEED LIQUID INOCULANT FOR SOYBEANS

LALFIX® LIQUID Soybean contains *Bradyrhizobium elkanii* selected for enhanced performance and competitiveness in soybean production. This species is known to nodulate soybean roots and fix atmospheric nitrogen in a symbiotic relationship with the plant.

ADVANTAGES

- LALFIX® LIQUID Soybean is a high quality inoculant with 1 x 10¹⁰ viable *Bradyrhizobium elkanii* cells per ml. *Bradyrhizobium elkanii* is a new species in the market place for early and aggressive nodulation as well as balanced performance in a range of environments.
- LALFIX® LIQUID Soybean is intended for soybean growers focusing on the benefits of strong nitrogen fixation - ultimately leading to enhanced nodulation, early vigor and higher soybean yields.
- LALFIX® LIQUID Soybean applied on-seed delivers a large quantity of *Bradyrhizobium elkanii* directly to the root zone. The use rate for on seed application is 44.5 ml per 45.4kg of seed.
- The addition of 30 - 44.5 ml. of clean water per 45.4 kg. of seed can be added to increase liquid application volume if desired, for increased seed coverage when applying LALFIX® LIQUID Soybean alone.
- In fields with no recent history of soybean production (less than 3 years), increasing the application rate of LALFIX® LIQUID Soybean or adding an application of LALFIX® PEAT Soybean is recommended. Consult your agricultural inputs supplier for recommendations specific to your farm.

APPLICATION GUIDELINES

ON-SEED APPLICATION RATE

- 44.5 ml per 45.4 kg of seed (1.5 fl oz per 100 lb of seed)

COMPATIBILITY

Refer to the website for a complete list of compatible pesticides, or contact your Lallemand Plant Care representative for more information.

About Lallemand Plant Care

Since the beginning of the 20th Century, LALLEMAND has been an expert in yeast and bacteria manufacturing. The family-owned company is now a global leader in the development, production, and marketing of microorganisms for various agri-food industries. Using sound science and know-how, LALLEMAND PLANT CARE (LPC) works closely with clients to deliver the right technology, in the right formulation, for the right application. LPC is committed to solving grower challenges, significantly improving yield and crop vitality.
