LALFIX PEAT CHICKPEA

CHICKPEA | STERILE POWDER | INOCULANT

DUAL-STRAIN INOCULANT FOR CHICKPEA

LALFIX® PEAT Chickpea is a high quality, dual-strain sterile peat powder inoculant that contains a select peat carrier that aids in the adhesion of the inoculant to the seed. This product can be applied on the seed through a variety of application methods that suit the grower's requirements.

ADVANTAGES

- **LALFIX PEAT Chickpea** is based on a sterile peat powder media which allows for an elevated delivery of *Mesorhizobium ciceri* directly to the seed.
- **LALFIX PEAT Chickpea** contains two unique strains of *Mesorhizobium ciceri* for balanced performance in a range of environments.
- **LALFIX PEAT Chickpea** contains a select peat carrier, which means better adhesion to the seed putting more inoculant in the furrow.
- **LALFIX PEAT Chickpea** is applied to the seed without water. Therefore, there is no drying period.
- **LALFIX PEAT Chickpea** can be used to double-inoculate first-year chickpeas and seeded into fields with a lower carryover of background rhizobia.
- Applying **LALFIX PEAT Chickpea** with an in-furrow application of **LALFIX® START SPHERICAL Pulses** inoculant increases and diversifies the rhizobia available to the crop.

CHARACTERISTICS

Active Ingredient
1 x 10^9 *Mesorhizobium ciceri* CFU/g

Package Size
252 oz case (6 x 42 oz packets per case)

Always read and follow label instructions.

APPLICATION RATE

ON-SEED

- 2.8 oz per 100 lbs of seed
- 1 case treats 9,000 lbs of seed
- Each 42 oz packet treats 1500 lbs of seed

About Lallemand Plant Care

Since the beginning of the 20th Century, LALLEMAND has been an expert in yeast and bacteria manufacturing. The family-owned company is now a global leader in the development, production, and marketing of microorganisms for various agri-food industries. Using sound science and know-how, LALLEMAND PLANT CARE (LPC) works closely with clients to deliver the right technology, in the right formulation, for the right application. LPC is committed to solving grower challenges, significantly improving yield and crop vitality.
