

DRY BEANS

STERILE POWDER

INOCULANT

## DUAL-STRAIN INOCULANT FOR DRY BEANS

LALFIX<sup>®</sup> PEAT Dry Beans is a high quality, dual-strain sterile peat powder inoculant that contains a select peat carrier that aids in the adhesion of the inoculant to the seed. This product can be applied on the seed through a variety of application methods that suit the grower's requirements.

### ADVANTAGES

- **LALFIX PEAT Dry Beans** is based on a sterile peat powder media which allows for an elevated delivery of *Rhizobium tropici* directly to the seed.
- **LALFIX PEAT Dry Beans** contains two unique strains of *Rhizobium tropici* for balanced performance in a range of environments.
- **LALFIX PEAT Dry Beans** contains a select peat carrier, which means better adhesion to the seed putting more inoculant in the furrow.
- **LALFIX PEAT Dry Beans** is applied to the seed without water. Therefore, there is no drying period.
- **LALFIX PEAT Dry Beans** can be used to double-inoculate first-year dry beans and seeded into fields with a lower carryover of background rhizobia.

### CHARACTERISTICS

#### Active Ingredient

1 x 10<sup>9</sup> *Rhizobium tropici* CFU/g

#### Package Size

252 oz case (6 x 42 oz packets per case)

**Always read and follow label instructions.**

### APPLICATION RATE

#### ON-SEED

- 2.8 oz per 100 lbs of seed
- 1 case treats 9,000 lbs of seed
- Each 42 oz packet treats 1500 lbs of seed

### About Lallemand Plant Care

Since the beginning of the 20th Century, LALLEMAND has been an expert in yeast and bacteria manufacturing. The family-owned company is now a global leader in the development, production, and marketing of microorganisms for various agri-food industries. Using sound science and know-how, LALLEMAND PLANT CARE (LPC) works closely with clients to deliver the right technology, in the right formulation, for the right application. LPC is committed to solving grower challenges, significantly improving yield and crop vitality.
