0(1)* An interval of 1 day is required when PRESTOP® and fluopyram are applied in the same part of the plant. When root system is treated with fluopyram, PRESTOP® can be sprayed in the foliage during the same day.

2** PRESTOP® can be sprayed to the foliage two days after application of Enzicur. Re-application of PRESTOP® is necessary after repeated Enzicur treatments.

- ➔ The recommended interval between PRESTOP® and active ingredient or product not mentioned in the list is 7 days.
- ➔ PRESTOP® can be applied in mixtures with compatible products. However, the mixture should be applied immediately after preparation.
- ➔ Do not tank mix PRESTOP® with concentrated solutions of pesticides or fertilizers.
