

IMPROVES PLANT NUTRIENT AVAILABILITY & PLANT GROWTH

LALRISE[®] START SC is a liquid suspension concentrate (SC) based on a plant growth-promoting microbe (PGPM) that increases crop establishment through improved root vigor and nutrient availability. This PGPM solubilizes phosphorus from organic and inorganic reservoirs, which promotes growth in young plants and increases root mass, crop homogeneity and yields.

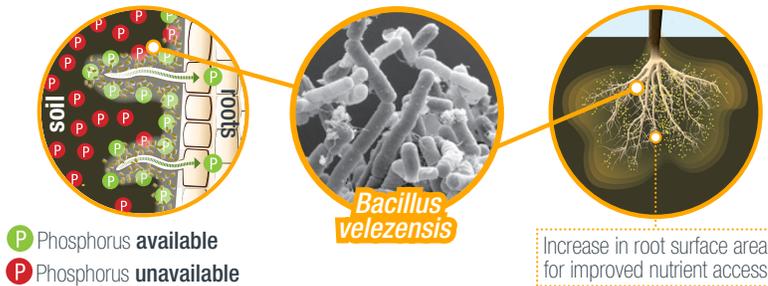

ADVANTAGES

The *Bacillus velezensis* bacteria contained in **LALRISE START SC** multiply and quickly colonize the rhizosphere by feeding on root exudates. In return, this bacteria population brings several benefits to the plants:

- **Stimulating the start-up** of young plants
- Improving soil exploration by roots, allowing better nutrient and water uptake
- **Enhancing the productivity** of plants, allowing better growth, yield, and quality

✓ **SOLUBILIZES PHOSPHORUS:**
Up to 28% increase of Phosphorus available in the rhizosphere*

✓ **NUTRIENT AVAILABILITY IMPROVES ROOT MASS GROWTH:**
Up to +20% of root biomass*

*Results obtained from various trials carried out over 10 years.

CHARACTERISTICS

Active Ingredient

2×10^{10} *Bacillus velezensis* CFU/ml

Package Size

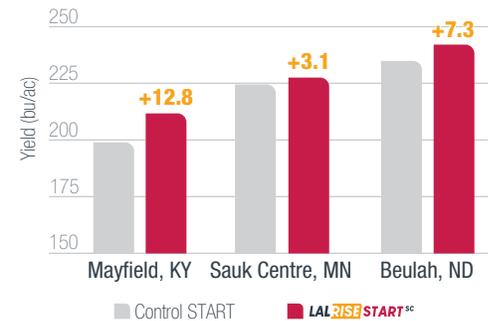

- 8 x 20 fl oz case
- 6 x 80 fl oz case

Application Rate: 1 oz/ac

In-furrow: Liquid kit with water and/or fertilizer carrier to the furrow.

Always read and follow label instructions.

About Lallemand Plant Care

For over 100 years, Lallemand has been an expert in yeast and bacteria manufacturing. It is now a global leader in the development, production, and marketing of microorganisms for various industries. Using sound science and know-how, Lallemand Plant Care provides effective microbial-based solutions that deliver agronomic, economic, and sustainable value to growers.
