

IMPROVES PLANT NUTRIENT AVAILABILITY & PLANT GROWTH

LALRISE® START SC is a liquid suspension concentrate (SC) based on a plant growth-promoting microbe (PGPM) that increases crop establishment through improved root vigor and nutrient availability. This PGPM solubilizes phosphorus from organic and inorganic reservoirs at both high and low pH levels, which promotes growth in young plants and increases root mass, crop homogeneity and yields.

ADVANTAGES

The Bacillus velezensis bacteria contained in LALRISE START SC multiply and quickly colonize the rhizosphere by feeding on root exudates. In return, this bacteria population brings several benefits to the plants:

- Stimulating the start-up of young plants
- Improving soil exploration by roots, allowing better nutrient and water uptake
- Enhancing the productivity of plants, allowing better growth, yield, and quality

SOLUBILIZES NUTRIENT **PHOSPHORUS: AVAILABILITY** Up to 28% increase **IMPROVES ROOT** of Phosphorus available MASS GROWTH: in the rhizosphere* Up to +20%of root biomass* Increase in root surface area for improved nutrient access

CHARACTERISTICS

Active Ingredient

2 x 10¹⁰ Bacillus velezensis CFU/ml

Package Size

- 8 x 20 fl oz case
- 6 x 80 fl oz case

Always read and follow label instructions.

ON-SEED APPLICATION RATE

Commercial seed treaters for ensured accuracy

OUNCES PER CROP 100 LBS OF SEED

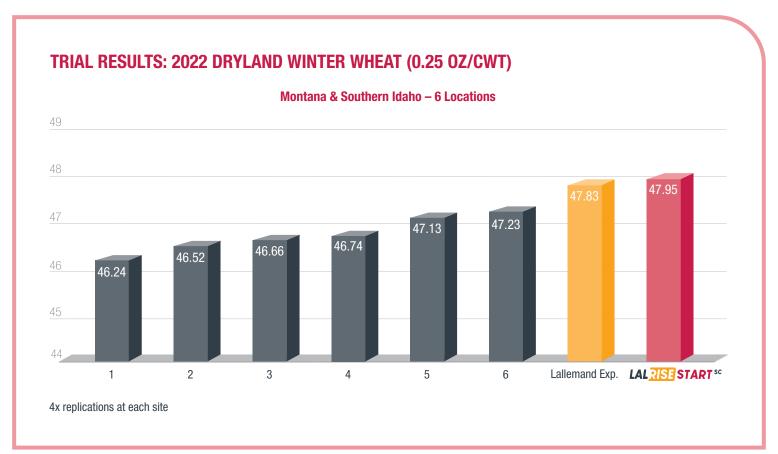

Wheat 0.25

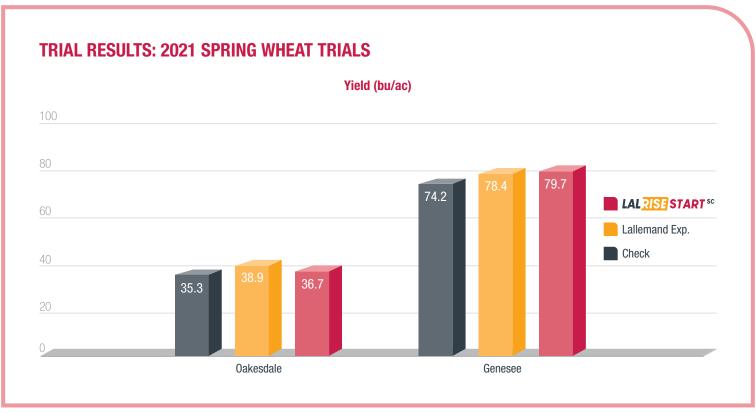

*Results obtained from various trials carried out over 10 years.

Phosphorus available

Phosphorus **unavailable**

About Lallemand Plant Care

For over 100 years, Lallemand has been an expert in yeast and bacteria manufacturing. It is now a global leader in the development, production, and marketing of microorganisms for various industries. Using sound science and know-how, Lallemand Plant Care provides effective microbial-based solutions that deliver agronomic, economic, and sustainable value to growers.
