

CHICKPEA

STERILE  
POWDER

INOCULANT

## CHARACTERISTICS

### Active Ingredient

1 x 10<sup>9</sup> *Mesorhizobium ciceri* CFU/g

### Package Size

6 x 1.2 kg case (6 x 42 oz packets per case)

Always read and follow label instructions

## DUAL-STRAIN INOCULANT FOR CHICKPEA

**LALFIX® PEAT Chickpea** is a high quality, dual-strain sterile peat powder inoculant that contains a select peat carrier that aids in the adhesion of the inoculant to the seed. This product can be applied on the seed through a variety of application methods that suit the grower's requirements.

### ADVANTAGES

- **LALFIX® PEAT Chickpea** is based on a sterile peat powder media which allows for an elevated delivery of *Mesorhizobium ciceri* directly to the seed.
- **LALFIX® PEAT Chickpea** contains two unique strains of *Mesorhizobium ciceri* for balanced performance in a range of environments.
- **LALFIX® PEAT Chickpea** contains a select peat carrier, which means better adhesion to the seed putting more inoculant in the furrow.
- **LALFIX® PEAT Chickpea** is applied to the seed without water. Therefore, there is no drying period.
- **LALFIX® PEAT Chickpea** can be used to double-inoculate first-year chickpeas and seeded into fields with a lower carryover of background rhizobia.

### APPLICATION RATE

#### ON-SEED

- 1 case treats 150 bushels  
(80 g per 45.4 kg of seed)

### About Lallemand Plant Care

Since the beginning of the 20th Century, LALLEMAND has been an expert in yeast and bacteria manufacturing. The family-owned company is now a global leader in the development, production, and marketing of microorganisms for various agri-food industries. Using sound science and know-how, LALLEMAND PLANT CARE (LPC) works closely with clients to deliver the right technology, in the right formulation, for the right application. LPC is committed to solving grower challenges, significantly improving yield and crop vitality.
