

DRY BEANS

STERILE POWDER

INOCULANT

## DUAL-STRAIN INOCULANT FOR DRY BEANS

LALFIX<sup>®</sup> PEAT Dry Beans is a high quality, dual-strain sterile peat powder inoculant that contains a select peat carrier that aids in the adhesion of the inoculant to the seed. This product can be applied on the seed through a variety of application methods that suit the grower's requirements.

### ADVANTAGES

- **LALFIX PEAT Dry Beans** is based on a sterile peat powder media which allows for an elevated delivery of *Rhizobium tropici* directly to the seed.
- **LALFIX PEAT Dry Beans** contains two unique strains of *Rhizobium tropici* for balanced performance in a range of environments.
- **LALFIX PEAT Dry Beans** contains a select peat carrier, which means better adhesion to the seed putting more inoculant in the furrow.
- **LALFIX PEAT Dry Beans** is applied to the seed without water. Therefore, there is no drying period.
- **LALFIX PEAT Dry Beans** can be used to double-inoculate first-year dry beans and seeded into fields with a lower carryover of background rhizobia.

### CHARACTERISTICS

#### Active Ingredient

1 x 10<sup>9</sup> *Rhizobium tropici* CFU/g

#### Package Size

252 oz case (6 x 42 oz packets per case)

Always read and follow label instructions.

### ON-SEED APPLICATION RATE

- 2.8 oz per 100 lbs of seed
- 1 case treats 9,000 lbs of seed
- Each 42 oz packet treats 1500 lbs of seed

### About Lallemand Plant Care

For over 100 years, Lallemand has been an expert in yeast and bacteria manufacturing. It is now a global leader in the development, production, and marketing of microorganisms for various industries. Using sound science and know-how, Lallemand Plant Care provides effective microbial-based solutions that deliver agronomic, economic, and sustainable value to growers.
